For Valencia and Silvertex (extended) fabrics - no quilting on the seat modules

Individual modules allow to create various types of systems / sets depending on your needs. A full list of possible configurations is available through the configurator on the website www.profim.eu or directly at the link: [CONFIGURATOR pCon](#).

The price for a configured set is the amount of the value of each module of a given set.

Possibility to freely choose the type of upholstery for individual elements within a given set (e.g. seat: Select, backrest: Synergy, screen: Sprint).

The screens can only be combined with wide seats: SW120, SW160 or SW240.

It is not possible to purchase the screen as a free-standing module.

Consumption of fabric and leather

The quantities below are only estimated. The real quantity of fabric- or leather-consumption may vary in accordance to the quantity of pieces on order. Please notice that before we accept any order in customer's own material we need to make sample trials. Please be aware that not every type of fabric/leather is suitable for upholstery. Volume of customer's own material must be agreed each time with Profim sales organization

Measuring methodology

Swivel armchairs and chairs are measured with a mechanism adjusted in such a way that the seat is as much as it is possible positioned levelly, while the backrest vertically. Swivel armchairs and chairs are measured on their castors, whereas visitor and reception chairs on hard glides. The measurements are approximate and can differ depending on the product configuration.

A - Total height

For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension. For products fitted with an additional backrest and headrest height adjustment - it is measured in both minimum and maximum positions of the backrest, headrest and gas lift.

B - Seat height

Measured at the highest point of the seat. For products fitted with a gas lift - it is measured with absorber's minimum and maximum extension.

C - Seat height with the burden

Seat measured according to EN standards (with seat burden). For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension.

D - Backrest height

Measured from the seat to the backrest upper edge. For products with adjustable backrest height - it is measured in the minimum and maximum position.

E - Headrest height

Measured from the backrest upper edge to the headrest upper edge. The headrest adjusted in maximum vertical position in relation to the upper and lower edge of the headrest. Measured in the headrest's minimum and maximum position.

F - Base, frame width

Measured at the uttermost points of the base according to the following figures.

G - Base diameter

Measured according to the figure underneath.

H - Seat width

Measured at the uttermost points of the seat.

I - Backrest width

Measured at the uttermost points of the backrest.

J - Total width

Measured at the uttermost points. For products fitted with adjustable armrests - it is measured with the armrests slid apart to maximum. For products fitted with armrests with adjustable pads - it is measured with the pads slid apart to maximum.

Measuring methodology

K - Seat depth

Measuring the distance between the uttermost point on the seat and the point it touches the backrest (the contact point is determined with a level positioned vertically to the backrest by projecting the S point from the backrest onto the seat) (1). For some shell chairs, where there is no distinct border-line between the seat and the backrest, the depth is measured on the bend halfway between the seat and the backrest (2). For products with additional adjustable seat depth - it is measured with minimum and maximum slide.

L - Seat (element) length

Measured at the uttermost points of the seat.

M - Total depth

Measured at the uttermost points. Swivel armchairs and chairs are measured according to the drawing underneath. For products with adjustable seat depth - it is measured with minimum and maximum slide.

N - Backrest (element) length

Measured at the uttermost points of the backrest.

O - Armrest height

For swivel armchairs and chairs – it is measured from the seat surface to the armrest upper edge. For armrests with adjustable height – it is measured in the minimum and maximum position. For visitor chairs – it is measured from the floor to the armrest upper edge.

P - Table top length

Measured at the uttermost points of the table top.

R - Table top width

Measured at the uttermost points of the table top.

S - Table frame length

Measured at the uttermost points of the table frame.

T - Table frame width

Measured at the uttermost points of the table frame.

U - Table top thickness

Table top (element) thickness is measured.

Terms of guarantee

applies to products manufactured after January 15th, 2019

1. Profim (the Guarantor) guarantees the efficient operation of its products.
2. Claims must be submitted at the purchase location, on a claims form (which can be downloaded from www.profim.eu), together with a purchase document (invoice or guarantee) and the guarantee certificate, if the certificate in question was issued to the Purchaser.
3. Claimed products will be accepted only if cleaned, packaged, and secured against damage in shipping.
4. The claimed product should be delivered, along with the documents listed in point 2, to the purchase location. If the claim is rejected, the product is sent back to the purchase location at the cost of the Purchaser.
5. The Guarantor shall determine whether the claim is justified within 14 days from the claimed products' delivery to manufacturer (together with claim application). A claims department employee will contact the Purchaser by phone or e-mail in order to determine the date and manner of product repair/replacement. Any doubts related to the claims procedure may be clarified with our customer service at +46 380 55 53 80 or info-se@flok.com. Submitting a claim does not entitle the Purchaser to withhold payment for the product.
6. In order to enable the manufacturer to identify the product, the claim notice should include information from the product's LABEL, i.e. the date of manufacture, order number, product number, and configuration. Any tampering with the LABEL will cause the guarantee to become null and void.
7. Guarantee period.
Refers to the products listed in the current price list and on the website www.profim.eu.

Guarantee period	Offer	Operating mode
5 years not longer however than 7 years from production date	Standard Classic - selected products	5 days a week, 8 hours per day (single shift work)
3 years not longer however than 4 years from production date	Classic	5 days a week, 8 hours per day (single shift work)

8. If the product is used for more than 8 hours per day, the guarantee period is reduced to three years.
9. Chair parts (e.g. castors, mechanisms, plastic parts) sold to the Purchaser are covered by a 2 years warranty.
10. If the product is replaced with another product free of defects or repaired by having one of its parts replaced, the course of the guarantee for such product or element is restarted. The guarantee period is extended by the period in which the Purchaser could not make use of the product.
11. If a defect cannot be removed or the removal involves excessive costs, the Guarantor may replace the product with another product free of defects. Any replaced defective products or parts thereof become the property of the Guarantor.
12. In case where an identical product is not available, the Guarantor may replace it with another product free of defects and with identical/similar parameters.

13. Claims concerning mechanical damage (scratches, dents, abrasions, upholstery soiling, missing parts etc.) will be accepted only if submitted within 7 days from the date of handing the product over to the Purchaser. By the above deadline, the Purchaser should unpack the product and remove the wrapping and protective elements in order to rule out mechanical damage. If reservations are made upon delivery with respect to the delivered product, a damage protocol must be drawn up in the presence of the courier or carrier and sent to the Guarantor together with the claims notice.
14. The refusal to hand the product (or any part thereof) over for repair in factory conditions, or preventing repair at the site of the Purchaser, causes the Guarantor to be released from its guarantee obligations and any guarantee claims to be waived.
15. The date of product repair at the site of the Purchaser is scheduled by the Guarantor.
16. Customized products i.e. chairs covered with fabric provided by the Purchaser and manufactured using technology that is not standard for a given product (such as using another base, armrests, covered by a fabric that is not part of standard offer etc.) are covered by one year guarantee.
17. The guarantee covers solely products located on the territory of the Republic of Poland or the country of the Distributor.
18. The Guarantor reserves the right to make innovations in the products that do not alter their durability and usability.
19. Repairs conducted by unauthorized persons or using unauthorized parts will cause the guarantee to become null and void.
20. The Purchaser's rights hereunder do not include the right to pursue lost profits and be indemnified for any potential damage caused by product failure.
21. The Guarantor's liability covers solely defects inherent in the product sold.
22. If the product is damaged after the expiry of the guarantee, the Guarantor may send, if possible, the Purchaser the required element or cure the defect using its factory service. In both cases the Purchaser will be charged accordingly.

Terms of guarantee

applies to products manufactured after January 15th, 2019

THE GUARANTEE DOES NOT COVER:

- a) defects caused by assembling the product in a manner not compliant with the manual and using it in a manner not compliant with its purpose,
- b) damage caused during transport and transloading (does not apply to transport provided by the Guarantor),
- c) failure to observe the recommendations contained in the user's manual, damage to castors, glides or floor caused by the inappropriate choice of available options (e.g. using hard castors on hard surfaces); the proper choice of options does not rule out damages that may be caused by using the chairs on carpets, panels, parquet floors etc. of inappropriate quality or on soiled surfaces (e.g. by sand),
- d) damage resulting from extreme climate conditions or environmental factors (e.g. acids, humidity etc.),
- e) damage caused by departing from standard specifications at the customer's request,
- f) operational wear and tear of wheels or upholstery materials,
- g) wear and tear of felt glides, which can be replaced under warranty, only in case the felt come away,
- h) differences in the fabrics shade, if the products come from different manufacturing series of the fabric manufacturer, and differences in individual products purchased by the Purchaser successively are claimed,
- i) discolouration of upholstery caused by some of the clothing colourants and additional colourants (such as those used in denim) which may transfer onto lighter upholstery (the effect can be intensified due to humidity and temperature and is irreversible),
- j) soiling and permanent discolouring of upholstery caused by external factors,
- k) leather upholstery products, where the natural features of the material, such as smell, difference in the structure, texture and shade differences, scars and insects pricks are claimed; during use (e.g. on the seat) the leather takes on shine and becomes looser; the Guarantor does not accept claims motivated by the above features,
- l) foam deformations,
- m) differences in the hardness of polyurethane cold-moulded foam resulting from parameter variations, which according to the DIN 53576/ISO 2439 norm are acceptable if within the range of $\pm 10\%$,
- n) damaging the surface of wooden elements as a result of contact with the edges of desks or other office furniture; mechanical damage of wooden surfaces is not considered to be a product defect,
- o) wooden components used in products, if the slight differences occurring in individual elements are claimed; the character of the raw material makes it impossible to precisely determine the final aesthetic effects, defined by the wood colour, shade, and figure,
- p) differences in geometry of plywood shells, which, because of their natural properties, may differ in tolerance of ± 1.5 degrees,
- r) small variations in HPL colours, in accordance with PN-EN 438 norm.
- s) differences in colour, gloss, tone or pattern in ceramic table tops. It is natural material and above features are characteristic of this type of surface.

GENERAL REMARKS CONCERNING PRODUCT USE:

- 23. The products should be protected against the direct influence of sunrays.
- 24. Leather products should not be placed next to a heater or another heat source. Please observe a minimum distance of 30 cm from the heat source.
- 25. Leather should be maintained using special care products that create a protective layer resistant to water and oil substances.
- 26. Products should be protected against becoming wet.
- 27. The upholstery fabric should be protected against soiling by grease, sweat, lubricants etc. In case of soiling, apply appropriate cleaning agents.
- 28. Avoid exposing upholstery to extensive, focused tension (for example standing on a chair) that can result in splitting or a rip of stitching as well as mechanical damage to upholstery.
- 29. Upholstered furniture is supposed to be used to sit evenly on the seat surface to avoid natural tendency of fabrics and leather to creasing and wrinkling due to ongoing pressure, temperature and the moist of the body (wrinkling and creasing is not a product fault but a natural effect; the bigger the upholstered surface the higher tendency for this effect to occur).
- 30. Products should be dusted at least once a week.
- 31. Hard castors are used with soft carpeting and carpets.
- 32. Soft castors are used with hard floors (e.g. PVC, parquet floors, floor panels).
- 33. Remarks concerning the use of products containing plywood elements:
 - temperature range from $+15^{\circ}\text{C}$ to $+30^{\circ}\text{C}$,
 - humidity range from 40% to 65%.
- 34. Ceramic tops meet the frost resistance requirements per EN 10545-12.
- 35. Table Chic RH and RR with metal and ceramic table top (apply only when frame/column is made of EPO1, EPO2, EPO3, with hard or teflon glides) can be for outdoor use according to EN 12944-2 cat. C3.
- 36. Plastic elements of the products like bases, armrests cover (especially light grey colours) require regular cleaning adequate to density of usage.

SYNERGY (CAMIRA) - PRICE GROUP 3

Epitomising natural simplicity, Synergy is a wool rich fabric which is at once both irresistibly soft and ultra-high performing. Delicately felted, with a beautifully relaxed drape, the understated aesthetics showcase the intriguing coloration of this considered textile.

- **Composition:**
- 95% wool
- 5% polyamide
- **Weight:** 400 g/m²
- **Certificates:**
- **Abrasion resistance:** 100000 Martindale cycles (BS-EN ISO 12947-2)
- **Pilling resistance:** 4 (BS-EN ISO 12945-2)
- **Flammability:** cigarette (BS-EN 1021-1)
- **Flammability:** match (BS-EN 1021-2)
- **Flammability:** (UNI 9175 Class 1IM)
- **Light fastness:** 5 (ISO 105-B02)
- **Maintenance:**
- -vacuum regularly
- -use dry-clean preparations
- -do not bleach

Because of the fact that the fabric Synergy is composed of 95% natural fiber, each of the batches shows variations in shade, which may be visible in products of follow-up orders. Additionally, an inherent feature of all natural fibers is the tendency to delicate fabric pilling.

STEELCUT 3 (KVADRAT) - PRICE GROUP 4

Steelcut 3 is a unicoloured strong worsted wool and polyamide woven fabric, combining durability, soft touch and colour depth. The construction create a three-dimensional surface resembling small pyramids or steel points. Despite its complex weaving technique, it has a simple and precise expression.

Composition: 90% worsted new wool, 10% polyamide

Weight: 825 g/lm

Abrasion resistance: 100 000 Martindale (EN ISO 12947-2)
